

(a) Wan 2.2: tea stated to be molasses-thick pours like water ($P = 4, H = 1$)

(b) HunyuanVideo 1.5: rated as following the liquid-repellent surface, but the glass moves untouched ($P = 1, H = 3$)

(c) MAGI 4.5B: the robot barely moves; rated fully plausible ($P = 4, H = 1$, not completed)
